ITINERARY

D : 11D/10N

From Friday to Monday

GALAPAGOS JOURNEY FLEET

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

DAY 1 Friday Mainland - Galapagos Santa Cruz Island

AM: Flight to Galapagos from Quito or Guayaquil

Before taking the flight you must pay 20 USD at the Galapagos Government Council counter that

is the fee for the migration control card.

Once in Baltra the passengers must go through an inspection point from the airport to make sure that no foreign plants or animals are introduced to the Galapagos Archipelago. Also, this inspection point is

where passengers have to pay for the entrance to the Galapagos National Park under the following parameters:

Afterwards you will be able to take a flight that takes 2 1/2 hours from Quito to and 1 1/2 hours from Guayaquil.

PASSENGERS	ADULT	CHILD (under 12 years old)
FOREIGNERS	\$100	\$50

Our guide will pick you up and will carry your luggage to the bus that transports the tourists to the ferries to cross the Itabaca Channel, after this passengers will be taken by another bus to the first visit to Ranch Manzanillo where visitors must wear comfortable walking shoes, light clothing and to carry a waterproof jacket, sun-block lotion, a camera and repellent for the first activity. The visit to Ranch Manzanillo includes a picnic lunch and a short walk before going on board the Motor Catamaran. It is important to follow these instructions in order to accomplish this itinerary properly. Also, please be aware that passenger's luggage will be sent directly to the Seaman Journey yacht.

DAY 1 Friday Mainland – Galapagos Santa Cruz Island

PM: Santa Cruz Highlands

Visitors will be delighted by the island's variety of life and geology as they will be journeying

across Santa Cruz into the highlands. Beginning at the coast and traveling across Santa Cruz the road departs from Puerto Ayora climbing through the agricultural lands and into the mist covered forests. Santa Cruz possesses all of the various life zones present in the archipelago.

As you travel through these zones birders are enchanted. Whether it's the bright red feathers of a vermillion flycatcher or one of Darwin's Finch almost every bird present in the islands can be found here. Santa Cruz offers excellent opportunities for viewing wild Galapagos Tortoises. Tracking tortoises is not the only exciting activity to be found in the highlands. There are also plenty of lava tubes, sinkholes and craters to explore. These eerie formations offer a fascinating hike into the belly of the island to view its volcanic make-up.

-/L/D

DAY 2: Saturday Galapagos Cruise Fernandina Island

AM: Mangle Point

Off the eastern coast of Fernandina is Mangle Point a superior snorkeling site and a beautiful location for riding in a panga or zodiac through a grove of mangrove trees.

A hike of about 1/2 miles is possible. Whether you hike, snorkel, or stay in your panga for a ride through the red mangrove trees, this second site of Fernandina Island is equally memorable.

While you are on your ride, you are likely to see sea lions, tortoises, pelicans, rays and birds too numerous to name them all.

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

DAY 2: Saturday Galapagos Cruise Fernandina Island

PM: Punta Moreno

P u n t a Moreno is located on the north coast of I s a b e l a I s l a n d between the

volcano Sierra Negra and Cerro Azul volcano. The trail runs along a lava flow Pahohoe (solidified lava in the form of corrugated or an accordion) into a complex of coastal lagoons, its main attraction are several species of birds which can be found around this lakes and mangroves. B/L/D

DAY 3: Sunday Galapagos Cruise Isabela Island

AM: Urbina Bay

Urbina Bay is located at the base of Alcedo Volcano on the west coast, between Tagus Cove and Elizabeth Bay. This area experienced a major uplift in 1954, causing the land to rise over 16 feet. The coast expanded half a mile out, leaving marine life stranded on the new shore. This area is also a great place for snorkeling. Urbina Bay is a path that starts at the beach where a landing is made wet, the course is approximately 3200m,

and substrates through the sand, pumice, lava, coral and vegetation in a coastal area suffered an uprising and the listener can appreciate iguana burrows. It is an ide al place to see red and blue lobster.

PM: Tagus Cove

Tagus Cove is located west of Darwin Volcano on Isabela Island. This was a favorite spot for pirates and whalers, a tradition is still observed that has continued since that time: the inscription of the names of boats. At the start of the walk, going up and passing the staircase, is a small cave where you will find inscriptions dating to the 1800s.

Its name originated from a British warship that went through the islands in 1814 looking for Galapagos Tortoise for food. Due to explosive eruptions must have occurred at the site, the substrate has a large amount of volcanic rocks of different sizes, among the most common are little balls of nearly spherical shape known as the "lapilli" or petrified rain.

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

DAY 4: Monday Galapagos Cruise Fernandina Island / Isabella Island

AM: Espinoza Point

Espinoza Point is a place famous for its large colonies of marine iguanas and a habitat of unique species like the flightless cormorant, Galapagos penguin, Galapagos hawk, and Galapagos snake.

PM: Isabela: Punta Vicente Roca

One of the most impressive and spectacular places of the enchanted Galapagos Islands; with high cliffs and tuffstone, ash and lava formations give this area a majestic touch. Located in the north-western coast of the island; comprises two distinct inlets. This large bay has a spectacular marine life. Here, you can see seahorses, sea turtles and the strange yet fascinating Mola-mola or sunfish. This bay is a great place to practice Panga Ride and Snorkeling. We also found: Penguins, Blue-footed boobies, Terns, Boobies, Sea lions. Also you can snorkel and observe sea turtles, stingrays and puffer fishes.

B/L/D

DAY 5: Tuesday Galapagos Cruise Santiago Island

AM: Playa Espumilla / Bucanero

Espumilla beach is located in northern coast of Santiago Island in James Bay. During the last presence the El Niño phenomenon, one of the two lagoons in this site, underwent a process of sedimentation, thus causing the disappearance of a representative colony of flamingos.

The main attractions are the palosanto forest and the marvelous. The beach is an important site for nesting marine turtles.

GALAPAGOS JOURNEY FLEET

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

PM: Puerto Egas, Santiago Island

Its black beach is located at the west side of the island and is the main attraction of the island. Their volcanic tuff deposits have favored the formation of this special black sand beach.

This site is called Puerto Egas, because there was an attempt of company of Hector Egas, to start the exploitation of salt, which failed because the price of salt in the continent was very cheap, and did not justify its exploitation in Galapagos. The project was abandoned and they left their infrastructure.

B/L/D

***DAY 6: Wednesday Galapagos Cruise
Rabida / Chinese Hat***

AM: Rabida

Rábida Island is unique because the red color of the rocks and sand. The volcanic material in this island is very porous and external factors as rain, salt water, and sea breeze have acted as an oxidizing agent.

A short walk along a trail lead you to a coastal lagoon behind the beach which permits you to observe the land birds such as finches, doves, yellow warblers, and mocking birds. At the lagoon there is a colony of flamingos.

GALAPAGOS JOURNEY FLEET

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

PM: Chinese hat

This is a small islet (1 sq km) located just off the southeastern tip of Santiago Island. It is a recent volcanic cone, shaped like a Chinese hat when seen from north side. On the west you can see lava formations, formed under the sea and raised upward, this is why coral heads are found on the lava.

This is an excellent visit for interpretation of geological features such as lava tubes and lava flows. The landscape is covered by sea lions colonies, marine iguanas, and Galapagos penguins.

These may even be seen from the summit of Darwin Volcano and from space. A number of historic

eruptions have been reported over the last 2 centuries. Santiago actually consists of two coalesced volcanoes: a typical shield volcano on the northwest end and a low, linear fissure volcano on the southeast end.

B/L/D

DAY 7: Thursday Galapagos Cruise Santiago Island

AM: Sullivan Bay

Santiago, also called James, or San Salvador Island, is located in the west central part of the Galapagos archipelago. It is the fourth largest island in the archipelago (following Isabela, Fernandina and Santa Cruz). Along with some of the large western volcanoes of Isabela and Fernandina, Santiago is also volcanically active, with many young flows and cones to be seen, particularly along the south, west, and east coasts.

DAY 7: Thursday Galapagos Cruise Santiago Island

PM: Bartolomé

Bartolome Island is situated in the Sullivan Bay. It has an altitude of 114 meters, from where we can observe one of the most beautiful sceneries of the Galapagos Islands such as:

Volcanic cones, lunar - like craters, lava fields, and the famous Toba formed pinnacle eroded by the sea. There is very little vegetation on this island.

GALAPAGOS JOURNEY FLEET

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

It has two breathtaking beaches where marine turtles exist and at the base of the pinnacle,

flamingos and other coastal birds, such as black-necked stilts and whimbrels.

The other beach is longer, but it has two old barges that were abandoned during the Second World War, when the USA used Baltra Island as a strategically point to protect the Panama Channel.

as well as a very small colony of Galapagos penguins.

B/L/D

B/L/D

PM: North Seymour

DAY 8:Friday Galapagos Cruise Santa Cruz Island

AM: Bachas Beach

These two small beaches are found to the West of Turtle Cove. Their sand is made of decomposed

coral, which makes it white and soft, making it a favorite nesting site for sea turtles. Behind one of the beaches there is a small brackish water lagoon, where occasionally is possible to observe

Is an uplifted (as opposed to volcanic) island and so is generally flat and strewn with boulders. There are good nesting sites here for a large population of magnificent frigate birds. Blue-footed boobies perform their courtship dance in the more open areas and swallow-tailed gulls perch on the cliff edges. Despite the tremendous surf that can pound the outer shore, sea lions haul out onto the beach and can be found bodysurfing.

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

DAY 9: Saturday Galapagos Cruise Genovesa Island

AM: El Barranco

The visitor site of El Barranco is located in the southern part of Darwin Bay on Genovesa

Island. The trail is on volcanic rock that has a length of 1.5 km and the tour can be done in about 2 hours. The youngest area of the island, from a geological point of view, lies in this area. The cliffs located in the south are composed of very fragile lava.

The natural erosion that has occurred in these lava flows has become the ideal place for nesting Storm Petrels. You can see two species of petrels that nest in cavities and holes in the lava. One of its main predators is the short-eared owl.

The red-footed booby nests only in the outer islands of the archipelago, Punta Pitt, Gardner (Floreana), Wolf, Darwin and Genovesa. Also present on this island is the masked booby. During the "panga rides" along the cliffs fur sea lions can be seen and several species of seabirds.

PM: Darwin Bay

This bay has its origin when the crater of this island collapsed below sea level. The wet landing is on a beautiful white coral sandy beach. This is a favorite island for birdwatchers: red footed-booby, masked boobies, wandering tattlers, lava gulls, whimbrels, yellow-crowned, and black-crowned lava herons, and yellow warblers can be seen in the area.

Continuing on the trail, visitors climb gradually to the edge of the cliff seeing Red-Foots nesting in the Mangrove trees below. Bird watching includes sightings of sharp-beaked finches, large cactus and ground finches, Galapagos doves, and swallow-tailed gulls. Reaching the end the trail at the cliff's edge offers an incredible view of the island and the many birds living there.

GALAPAGOS JOURNEY FLEET

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

DAY 10: Sunday Galapagos Cruise Santa Cruz Island / Santa Fe Island

AM: Plazas

Plazas is located at the east of Santa Cruz Island, and forms part of two islands known as Islas Plazas. Despite its small size, some of

the most interesting and outstanding species of the Galapagos are found here. The Plazas land iguanas are smaller than its relatives found at other islands.

Throughout the island are several hybrid iguanas, a result of crossing a male marine iguana and a female land iguana, they are unique, recognizable at first glance by their black/gray color, with a land iguana's crest, but face and tail of the marine iguana.

The big population of iguanas is due to the presence of tunas, their favorite food. Swallow tailed gulls nesting in the rugged cliffs are seen along with other sea birds as: Audubon shearwaters, red-billed tropicbirds, frigate birds, and brown pelicans.

PM: Santa Fe

Located in the southeastern part of the Galapagos, this island was formed from an uplift instead than a volcanic origin, this is why is mostly flat. There are some theories which

assure this could be the oldest island in the Archipelago. Santa Fe is the home of a number of endemic species like the Galapagos hawk, Galapagos snake, Galapagos mockingbird, rice rats, and one of the two species of lands Iguanas of the islands.

After disembarking in the beautiful and clear waters you will be in contact with one of the many sea lion colonies. Along the trail many salt bushes can be seen as well giant Pickly pear cactus, gigantism is a characteristic of oceanic islands. There are great possibilities of snorkeling with playful sea lions and tropical fishes.

GALAPAGOS JOURNEY FLEET

Itinerary D: 11D/10N Friday to Monday

Sample of a day by day itinerary with the description of the visits and the activities
(subject to change with previous notification)

DAY 11: Monday Galapagos Cruise San Cristobal Island

AM: Jacinto Gordillo Breeding Center

In 2004 the Breeding and Rearing Center for young tortoises Jacinto Gordillo, named after a famous settler, was located in Cerro Colorado, San Cristobal Island, in order to take care of young tortoises. In 2008 an assisted reproduction program started on the island with due to the birth of a little turtle in captivity.

After the morning excursion you will be taken to the airport for your flight to the mainland.

B/-/-

Transfer to San Cristobal airport
Flight to Quito or Guayaquil
